

## **Federal Legislative History Chart Overview**

by William Magee

I designed this chart to give students researching Federal legislative history the resources available for doing so, the process, and options. This flow chart serves as a reminder of the training received in our legislative history clinic offered every spring. We strongly encourage students to take this clinic if they have an interest in Federal practice. I give it to the student as a laminated three-hole punched chart for ease of use and durability. I do update this chart as new products become available or as publishers add to their content.
